PROFILE

Full Stack Developer Intern contributing to a production GRC fintech application. Builds with HTML, CSS, JavaScript, React and TypeScript on the frontend, alongside Node.js, PostgreSQL and AWS. Open to junior software engineering opportunities, including remote roles.

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS, Vite, TanStack Query, Zod

Backend & Data: Node.js, REST APIs, PostgreSQL, SQL

Cloud: AWS, Lambda, API Gateway, RDS, S3, Cognito, CDK, CloudWatch

Engineering Tools: Git, GitHub, Vitest, Postman, OpenAPI / Swagger

EXPERIENCE

Full Stack Developer Intern | Complyr | Oct 2025 - Present

- Build and maintain production application features across frontend, backend, database and cloud layers.
- Develop interfaces, APIs, authentication and authorization flows, and business workflows.
- Debug and maintain cloud-backed application features and integrations using Git-based workflows.
- Use AI coding tools for implementation support, debugging and research; review and validate generated code.

SELECTED PERSONAL PROJECTS

Movie Discovery & Search: Fetches popular movies and search results from TMDB and builds poster and title cards using DOM APIs.

Weather App: Uses Fetch API and async/await to retrieve current weather and render conditions or an error state.

Dragon Repeller RPG (In Progress): Explores locations, inventory, combat, upgrades and player progression with JavaScript state.

EDUCATION

B.Sc. in Computer Science, Statistics and Mathematics

Chandigarh University | Graduated June 2024
